

## Diagnostic Imaging

The Diagnostic Imaging Department provides the following services: conventional X-rays, mammograms, ultrasound and telederm imaging. Studies requested such as Computed Tomography (CT) and Nuclear Medicine will be done at off-base facilities with a referral from your primary care manager. MRI's will be accomplished through the Veteran Affairs (VA) in Oklahoma City.

Our staff in Diagnostic Imaging will accomplish all scheduling and cancellations for the studies we provide here. Children are not allowed in the exposure rooms unless it is for their appointment only. For their protection and safety we ask that they have proper supervision if their parent/guardian is being cared for in our department. We do not provide childcare so please plan ahead or reschedule at your convenience.

Phone number: 582-6177 for appointments or any questions you may have.
